

Patina Inline NXT

Milled grooves for a dimensional effect

Patina Inline NXT is a through coloured fibre cement panel with a linear milled surface structure. The indentations create an atmospheric play of shadows, which changes depending on the time of day and viewing angle. A fine patina will form on the surface over time. The restrained colours create a stylish harmony in combination with the milled surface.

To request samples of Swisspearl Patina Inline NXT please contact Cladding Corp at **(888) 826-8453** or **info@claddingcorp.com**
