

Patina Rough NXT

Stone-like finish, adding character for a natural effect

Patina Rough NXT offers a natural and authentic look, with a stone-like finish that adds character to any facade. Subtle variations in colour and texture make each panel unique. Like all variants of the Patina series, Patina Rough NXT forms a fine coating over the years, which gives the facade an individual character. The exquisite shades support the rough surface in its expressiveness and form a harmonious combination with the other Patina products.
