National Medal of Honor Museum – Arlington, TX

Ceramic5 Metallic Series Feature for Dramatic New Museum

Cladding Corp is honored to have Ceramic5 selected as part of the cladding solution for the National Medal of Honor Museum in Arlington, TX, designed by Rafael Viñoly Architects. This landmark project features a 130,000-square-foot Exhibition Hall, suspended 40 feet above ground by five massive concrete mega columns symbolizing the U.S. Armed Forces branches. Portions of the museum's striking exterior, clad in Ceramic5's Metallic Series (Corten GC21 & Indio Blue LY07), deliver a bold, durable finish that embodies strength and resilience while enhancing the building's modern and striking architectural presence.

Panel Type: Ceramic5, Metallic Series

Architect: Rafael Viñoly Architects
